

# Defining Rampage Violence across Completion Status: Towards a More Comprehensive Model

Janelle Hawes & Eric Madfis

## Existing definitions omit:

- Low or no-fatality events
- Foiled or interrupted attacks
- Injured as victims
- Perpetrators' abilities
- Completion status

## The Rampage Violence Status Model (RVSM)

		Descriptors/Actions for RVSM Stages					
		Information Gathering	Decision Making	Material Acquisition	Arrival at Target	Rampage Act/Event	
Rampage Violence Status Model (RVSM) Stages	Researched	→ [Octagon]					No Victim Casualties
	Planned	→ [Octagon]					
	Prepared	→ [Octagon]					
	Initiated	→ [Octagon]					
	Interrupted	→ [Octagon]				Stopped NOT by Self	< 4 Victim Fatalities, @ least 1 Victim Fatality/Injury
	Attempted	→ [Octagon]				Stopped by Self	
	Completed	→ [Octagon]				Stopped by any means	4+ Victim Fatalities

## Benefits of RVSM
